Subject: Comment about draft WDR requirement to sample DP 40 & 41

Denise,

As we spoke on Friday, September 14, 2013, regarding the sampling of DP40 & 41. We have spoken with the Panoche water District as well as the landowner to the south of the company's facility. Obtaining samples from these two Drain Pumps is problematic because according to Panoche Water District, these pumps are privately owned and there is no obligation for the landowner to run them. Also, there may be egress issues where these pumps are located because the property is in escrow. It is tentatively scheduled to close in November 2013. The present landowner was not sure who the principals of the company buying the property are. This presents an access problem if we cannot negotiate an egress agreement.
